

附录6 环境因子对样地植株密度影响的线性回归模型选择结果。最优模型以粗体标出。AICc, 根据样本数  
量修正过后的AIC值; delta, 模型与AICc最小模型间的AICc值差异; weight, 模型为最优模型的概率。

Appendix 6 Results of comparison of linear model of environmental factors effects on stem density of each plot.

The best supported model is in bold. AICc, AIC corrected by limited sample size; delta, difference in AICc  
between the model and the parsimonious model; weight, possibility of the model be the best supported model.
