

附录 6 不同干旱处理下不同丰度真菌群落两两 Bray-Curtis 距离相异性。不同大写字母表示同一丰度真菌类群两两 Bray-Curtis 距离相异性差异显著。不同小写字母表示不同丰度真菌类群两两 Bray-Curtis 距离相异性差异显著 ($P < 0.05$)。CK: 自然对照; D3: 干旱三年; D10: 干旱十年。

Appendix 6 The pairwise Bray-Curtis dissimilarity of whole, abundant and rare fungal community under different drought treatments. Different capital letters indicate significant differences in the pairwise Bray-Curtis dissimilarity of same abundance fungal taxa. Different small letters above bars indicate significant differences in the pairwise Bray-Curtis dissimilarity among all, abundant and rare fungal taxa ($P < 0.05$). CK, Ambient control; D3, Drought for 3 years; D10, Drought for 10 years.
