

附录 7 荒漠土壤优势真菌门的相对丰度。CK: 自然对照; D3: 干旱三年; D10: 干旱十年。不同字母表示各优势真菌门相对丰度在不同干旱处理间的差异显著($P < 0.05$) (nCK = 11, nD3 = 12, nD10 = 11)。

Appendix 7 Relative abundances of the top 3 fungal phylum in the temperate desert. CK, Ambient control; D3, Drought for 3 years; D10, Drought for 10 years. Different letters indicate significant differences in relative abundance of each fungal phylum among different drought treatments ($P < 0.05$) (nCK = 11, nD3 = 12, nD10 = 11).
