

图2 兽类、鸟类、两栖类、造礁石珊瑚和苏铁的红色名录指数(图片来源: IUCN, 2022a)。蓝线为所有门类的总体红色名录指数(RLI)。如果一类群的所有物种都属于无危, RLI值为1 (即表示近期预计没有灭绝的风险); 如果一类群所有物种都已绝灭, RLI值为0。

Fig. 2 The Red List Index (RLI) of species survival for mammals, birds, amphibians, reef-forming corals and cycads (Fig. from IUCN, 2022a). The blue line indicates the overall RLI for all the taxa combined. An RLI value of 1.0 equates to all species qualifying as Least Concern (i.e., not expected to become Extinct in the near future). An RLI value of 0 equates to all species having gone Extinct.
