

附录7 沿降水梯度细菌前10个门的相对丰度。不同字母表示各优势细菌门相对丰度在不同降水梯度间的差异显著 ($P < 0.05$)。 Appendix 7 Relative abundances of the top 10 bacteria phylum with precipitation in the Gurbantunggut desert. Different letters indicate significant differences in relative abundance of each bacteria phylum among different drought treatments ($P < 0.05$).
