附录 3 新疆杨树人工林相近样地间空间自相关 **Gi** 热点分析。对蜘蛛的 Shannon 多样性指数、Simpson 多样性指数、Pielou 均匀度指数、科数、属数、种数、个体数及各功能型蜘蛛均进行了空间自相关 Gi 热点分析, 结果均如图所示, 无空间自相关关系。

Appendix 3 Spatial autocorrelation Gi Hotspot Analysis among different forest types of Xinjiang poplar plantations. There are no spatial autocorrelations for the Shannon diversity index, Simpson diversity index, Pielou evenness index, number of families, genera, species, individuals and each functional type of spiders by spatial autocorrelation Gi hotspot analysis.
