附录4 MaxEnt模型ROC曲线验证结果。AUC (area under the curve)值为ROC曲线下方与坐标轴围成的面积大小,AUC值越接近1, 表明模型的分切效果越好。

Appendix 4 Receiver operating characteristic (ROC) curve verification results of MaxEnt model. The area under the curve (AUC) is the area between the ROC curve and the horizontal axis, and the closer the value of AUC is to 1, the better the segmentation ability of the model.
