

附录 5 鬼臼亚科最大进化支可信度(maximum clade credibility, MCC)树。节点处标注为共同祖先节点(Common ancestor node)年龄和 95%最高后验概率密度(highest probability density, HPD)区间的共同祖先节点年龄范围。节点处蓝色条带为 95%HPD 区间的共同祖先节点年龄范围。

Appendix 5 Time-calibrated maximum clade credibility (mcc) tree of Podophylloideae. Reconstructed common ancestor age and height of 95% highest probability density (HPD) are labeled at the node. Blue bars at nodes are 95% HPD intervals for node heights.
