

附录1 土壤线虫各营养类群在不同降水强度及氮添加处理下的相对多度。N0和N10分别为不添加氮和添加氮的处理。图中不同小写字母表示土壤线虫各营养类群相对多度在N0和N10处理下不同降水强度处理间差异显著($P < 0.05$)。OP: 杂食/捕食线虫; FF: 食真菌性线虫; BF: 食细菌性线虫; PP: 植物寄生线虫。

Appendix 1 Relative abundance of each trophic group of soil nematode under different precipitation intensity and nitrogen addition treatment. N0 and N10 are treatments without and with nitrogen, respectively. Different lowercase letters represent significant differences among different precipitation intensity treatments under N0 and N10 treatments. OP, Omnivores-predators; FF, Fungivores; BF, Bacterivores; PP, Plant-parasites.
